

Remarks

The Applicant has carefully read and reviewed the Office Action mailed March 8, 2005, and the references cited therewith. Claims 1-22 were allowed. Claims 1-6, 9, 10, 13, and 16-22 are amended in this response. Claims 1-22 are pending.

Allowable Subject Matter

The Applicant graciously appreciates the recognition of allowable subject matter of originally filed claims 1-22. However, the claims have been amended to more accurately reflect what Applicant believes is the proper scope of the invention.

Claim Amendments

The claims have been amended to address the informalities cited by the examiner. Specifically, all of the objected to terms have been removed.

Applicant submits the drawings as originally filed show every feature of the invention specified in the currently amended claims. Specifically, the claims have been amended to replace the word "module" with "circuit". The drawings clearly show this feature as the PCB 132. Support for this can at least be found in the specification at page 8, lines 6-19 and at page 9, lines 15-29. None of the claim amendments add new matter.

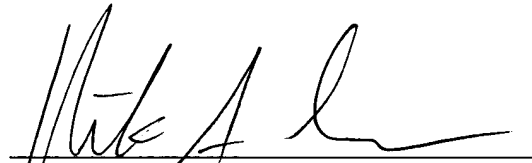

Conclusion

Claims 1-22 are believed to be patentable over the prior art of record, therefore, reconsideration of claims 1-22 is requested.

Applicant respectfully asserts that the present claims particularly point out and distinctly claim the subject matter which is regarded as the invention.

Therefore, it is respectfully submitted that the pending claims are in condition for allowance, and favorable action with respect to the present application is requested.
